

AMENDMENTS TO THE SPECIFICATION:

Please delete the word "Description" at page 1, line 1.

Please add the following centered heading at page 1, line 4:

TECHNICAL FIELD

Please add the following centered heading at page 1, line 7:

BACKGROUND

Please add the following centered heading at page 2, line 3:

SUMMARY

Please add the following centered heading at page 4, line 19:

DESCRIPTION OF THE DRAWINGS

Please add the following centered heading at page 5, line 6:

DETAILED DESCRIPTION

Please replace the Abstract on page 15 with the following new Abstract:

An apparatus includes a piezoelectric substrate having a signal line with a first electrical port and a second electrical port, and a first partial filter connected in series with a second partial filter. The partial filters are arranged between the electrical ports. The first partial filter includes a first serial transducer and a second serial transducer located in an acoustic path and in series branches of the signal line. The serial transducers are acoustically coupled with one another. The second partial filter includes a coupler transducer and an end-positioned transducer that are located in a double mode surface acoustic wave (DMS) path. The end-positioned transducer is positioned at an end of the signal line.

Please delete the phrase "Figure 1a" at page 15, line 16.
